

place yet allow easy access thereto. Further, air bladders 14 and flexible support member 30,
at cut when mounted on seat back 22, together are configured for providing lumbar support.

IN THE CLAIMS

Sub. b1 Please cancel claims 10-18.

Please substitute the following amended claims 1, 2 and 3 for original claims 1, 2 and 3:

a2 1. (Amended) An article of furniture, comprising:
a support having a support surface including a flexible support member having at least one
upper segment and at least one lower segment, at least one of said upper segment and said lower
segment connected to said support surface;

5 a plurality of air bladders mounted relative to said support surface, each said air bladder
having expandable foam therein;

Sub. b1 b2 at least one fluid line fluidly coupling said air bladders together; and
a single valve fluidly coupled with said at least one fluid line.

2. (Amended) The article of claim 1, wherein said at least one fluid line is coupled to said
air bladders in one of ^aparallel connection of said air bladders and ^aseries connection of said air blad-
ders.

3. (Amended) The article of claim 2, wherein said at least one fluid line is coupled to said
air bladders in ^{sub}parallel connection of said air bladders.

Please add new claims 19, 20 and 21 as follows:

Sub. b1 b2 b3 19. (New) The article of claim 1, wherein said support surface further includes at least
one pocket, at least one said lower segment being removably insertable into at least one said
